I am having the same trouble as a lot of people with the game. Once I try to start a game, all the boxes are empty for the character creation and there seems to be nothing I can do. I have tried putting the files on my anti-virus white list, running the game in "beta" and generally anything else that was suggested in the forums. The weird thing is I was able to run this game in the past - over a year ago. The game seems abandoned by the developer. Caveat Emptor.
